## Best Practices

### **1. Title of the practice:**

“One Rupee Initiative: Fostering Unity through Micro-Contributions”

### **Introduction:**

In our esteemed college, we have embarked on a unique and impactful endeavour called the "One Rupee Initiative," where students and teachers voluntarily contribute one rupee every day. This collective effort aims to create a sense of community, instil a spirit of giving, and contribute to meaningful causes.

**Objectives of the practice:** The One Rupee Initiative is driven by several key objectives:

- **Community Building:** Fostering a sense of unity and collaboration among students and teachers.
- **Philanthropy:** Channeling small, regular contributions into a collective force for positive change.
- **Social Responsibility:** Instilling a culture of giving back to society and contributing to the greater good.

### **Context:**

In the fast-paced environment of academia, the One Rupee Initiative provides a tangible way for our college community to come together, transcending individual differences and making a collective impact on society. This initiative is not just about financial contributions; it's about building a culture of empathy and shared responsibility.

### **Practice:**

Participation in the One Rupee Initiative is entirely voluntary. Students and teachers contribute a nominal sum of one rupee every day, symbolizing the power of collective micro-contributions. The funds collected are carefully managed and directed towards community projects, charitable causes, or supporting individuals in need. Regular updates and transparent communication ensure that contributors are informed about the impact of their contributions.

### **Evidence of Success:**

Though the practice has been started recently, the success of the One Rupee Initiative is evident in the positive changes it has brought about. The collective power of our small contributions has made a tangible difference in the lives of those less fortunate. Additionally, the initiative has strengthened the sense of community within our college, fostering a spirit of cooperation and shared purpose.

### **Problems Encountered:**

While the One Rupee Initiative seems largely successful, challenges have been encountered. Some participants may face financial constraints, and communication about the initiative needs to be on-going to ensure understanding and commitment. Addressing these challenges requires a collaborative approach, with open dialogue and flexible solutions.

### **Resources Required:**

The success of the One Rupee Initiative relies on the collective involvement of the college community. Minimal financial resources are needed for the collection and management of contributions. Transparent communication channels, such as posters, newsletters, and regular updates, are essential to keep participants informed and engaged. Importantly, the dedication and enthusiasm of the participants themselves serve as the most valuable resource for the initiative's success.

**In conclusion**, the One Rupee Initiative embodies the spirit of unity and collective responsibility, proving that even the smallest contributions can make a significant impact when combined. It stands as a testament to the power of community-driven initiatives in fostering positive change within our college and beyond.

---

## **2. Title of the practice:** Promotion of Environmental Cleanliness and water conservation.

**Objectives of the practice:** The objective of the practice is

- To create a better learning atmosphere which makes the environment clean in and around the college.
- To foster a sense of connection to the natural world, promoting sustainable development.
- To develop the habit of cleanliness in students about self and college surroundings.
- To generate awareness among students about sanitization and public health.
- To spread the cleanliness drive to the villages.

### **Context:**

The College is conscious about maintaining cleanliness in and around the campus, conserving the water resources and hence has a good effect on the environment of the college. The need for maintaining the right cleanliness, sanitization, and hygiene in our community is very essential. Unhygienic conditions can cause the spread of various epidemics. Cleanliness is the most basic step for preventing diseases. So, it is necessary to adopt the habit of cleanliness.

**Practice:** All students, teaching staff, non-teaching staff, and NSS volunteers of our college participate in swachhta abhiyan of the college campus. Students clean the campus themselves. Students are also instructed in NSS Camp about cleanliness to actively

participate in cleanliness, they, in turn, encourage people of the locality about the importance of cleanliness. The NSS unit of the College undertakes various activities, like organizing a talk on several aspects, staging a drama on the use and abuse of water, avoiding using plastics, etc.

The college has a working system of rainwater harvesting in the campus. It helps in the recharge of underground resources of water during the rain time. In addition, the college has arranged for the tubs and buckets to collect the wastewater coming out of the water cooler. This water is reused by pouring it into the plants around the verandah in the campus.

**Evidence of success:**

- We got success to maintain a clean environment in the college campus.
- Students along with faculty are now in habit of throwing waste in dustbins.
- During recess or other times also, if someone has to throw bottled water, then it is poured into the plants and not in the drains.

**Problems encountered and resources required:**

- Cleanliness of the sports ground is still a big problem due to lack of grass cutting machine.
- A proper dumping ground is not available for the waste collected. We are dependent on the Nagar panchayat vehicle for dump disposal.
- Plastic waste decomposition is a big problem.
- We have no regular fourth class employee to take care of routine cleaning of toilets and campus area.
